

**FOR IMMEDIATE RELEASE**

**Greene County, Mississippi, Selects AmeriPro Health as Its New EMS, 911 Provider**

*The Board of Supervisors unanimously recommended the company assume operations across its five districts*

**ATLANTA (August 21, 2023)** - [AmeriPro Health](https://www.ameriprohealth.com/), a leading provider of patient logistics and last-mile healthcare delivery services, announces its partnership to provide EMS and 911 services to Greene County, Mississippi. The contract begins September 1.

"We are deeply committed to elevating healthcare in rural communities," says David Grayson, vice president of AmeriPro Health. "Through our state-of-the-art ambulance services, enhanced clinical and diagnostic offerings and robust last-mile care solutions, we're pioneering unique partnerships that weave together the strengths of local healthcare providers and hospitals to transform and uplift regional healthcare."

As a result of the partnership, AmeriPro Health will provide the county with a new fleet of tech-enabled ambulances that exceeds Mississippi's state requirements and a team of first responders equipped with the latest training and expertise.

"We are honored to be the entrusted provider for Greene County," says Larry Richardson, AmeriPro Health's chief business officer. "Our commitment remains steadfast: to ensure the community receives the high-quality care they deserve, every moment of every day."

This news comes on the heels of AmeriPro Health's expansion into Lexington and Louisville, Kentucky, and New Albany, Indiana, earlier this month when the company acquired American Medical Response, Inc.'s (AMR) operations in those markets.

Established in 2018 with 10 ambulances in the Metro Atlanta area, AmeriPro Health has rapidly grown to 800+ employees with operations across six states.
